iWork® Pages® Templates for Mac OS X® and iPad  
Create Striking Documents!

### **FaCILISI STORE Monday, June 28, 2010**

FaCILISI.COM today is pleased to announce the introduction of iPad Pages® Templates, an iPad compatible version of their best-selling iWork® Pages® Templates, made for Apple's® iWork® Pages® application for Mac®. The professionally designed, editable templates enable the effortless creation of brochures, flyers, postcards, posters, business cards, and envelopes. Users need only add their own text and pictures to create stylish documents in iWork® Pages® for Mac OS X®, or iPad Pages® for iOS 3.2 or later.

For those without the services of an experienced graphic designer, templates offer an inexpensive, practical alternative. iWork®, Apple's® highly successful application for Macintosh®, consists of three components: Pages® (documents), Numbers® (spreadsheets), and Keynote® (presentations). Pages® provides both word processing and layout and design capabilities. The application is template-friendly; Apple® includes over 180 of their own design, for resumes, brochures, school reports, or invitations. And the application's new sibling, Pages® for iPad, includes 16 starter templates.

FaCILISI.COM iWork® Pages® Templates offers the user an additional 1300+ templates from which to choose. The FaCILISI STORE website, itself of exemplary design, facilitates the browsing experience by displaying templates under three headings: Categories, Themes, and Packages. There are 11 Categories: Brochures (horizontal or vertical), Flyers (h or v), Postcards (h or v), Posters (h or v), Letterheads, Business Cards, and Pages® iPad. One can easily navigate through the hundreds of templates in each category. Each can be purchased individually, fostering a mix'n'match approach.
